Education

ABES ENGINEERING COLLEGE, GHAZIABAD (CGPA-8.1) (2023 - 2027)
Bachelor of Technology in Information Technology

LORD MAHAVIRA ACADEMY, SAHARANPUR (78.2%) (2022 - 2023)
Senior School Certificate Examination (CBSE)

Technical Skills

- **Languages & Fundamentals:** C++, C, JavaScript, SQL, Data Structures & Algorithms, OS, DBMS, OOPS
- **Frontend Development:** React.js, Next.js, HTML5/CSS3, TailwindCSS, Framer Motion.
- **Backend Development:** Node.js, Express.js, MongoDB, Socket.io, Bcrypt, REST APIs.
- **Tools:** Git (Branching, Merging, Pull Request), GitHub, Postman

Projects

Banking Ledger & Transaction System | Tech Stack: Node.js, Express.js, MongoDB, JWT

- Built a secure banking backend using Node.js, Express, and MongoDB to manage end-to-end account operations and financial data.
- Designed a real-time ledger transaction engine with atomic credit/debit processing, reducing data inconsistency errors by enforcing strict write integrity checks.
- Implemented JWT-based authentication with role-level access control, securing all financial endpoints against unauthorized access.

Agora Debate Platform | Tech Stack: React, Express.js, Node.js, Socket.io

- Architected a full-stack community hub for ABES's largest Debating society, leveraging MongoDB for scalable data persistence and Next.js for server-side optimized performance.
- Developed a secure authentication system using Bcrypt password hashing and JWT-based session management, ensuring robust protection for user and admin dashboards.
- Created a high-performance UI with Framer Motion and Tailwind CSS, featuring a modular component architecture to support real-time announcements and dynamic event scheduling.

GrowEasy AI CSV Importer | Tech Stack: Next.js, Node.js, Express.js, Gemini API | [Live Demo](#)

- Built an AI-powered CSV importer that maps messy lead exports into a fixed CRM schema using Gemini.
- Engineered a batched extraction pipeline with JSON-schema validation and automatic retry handling.
- Designed a responsive Next.js interface with CSV preview, drag-and-drop upload, and live import summaries.

Achievements and Leadership

- Led development for two internal hackathons as the primary developer, managing cross-functional teams of 4 and delivering working prototypes within 36-hour constraints.
- Achieved **1650+ contest rating on LeetCode**, ranking in the top percentage of global participants through consistent performance in weekly and bi-weekly challenges.
- Solved **450+ DSA problems** across LeetCode (350+) and CodeChef (100+), demonstrating strong proficiency in C++ and problem-solving under competitive conditions.
